

Analysis of Articles Based on Parameters Dictated by Human Behavior Towards Literature

Bonani Hazarika, Manisha Digra & Manisha Dudi

1 Dependencies

- pandas package
- requests package
- stanford lex parser: <http://nlp.stanford.edu/software/lex-parser.shtml#Download> .(Unzip this parser, after download, in folder Metaphor itself before running the code.)

2 How to Run

We are providing two input demo files in main folder BTP. Before using a file, rename it to 'input.txt'. One has to place the input file (input.txt) in each of the subfolders before running the makefile.

- In folder Idiom.
On terminal type: make
- In folder Metaphor.
On terminal type: make
- In folder NGram.
On terminal type: make
- In main folder-BTP.
On terminal type: rating.py
